

Mask/Withhold callerid when dialing out using a prefix

This example is written for the **Canistracci OIL** tenant. Create the objects with a **Docs Demo** prefix, test them on non-production numbers, and then adapt the same structure for the production tenant.

Masking or withholding the callerid when dialing out is directly supported with a special destination. You can use it in a Feature Code as follows

400px

File not found.

Canistracci OIL example screen for Mask/Withhold callerid when dialing out using a prefix.

Validation

- Confirm the tenant selected in the top bar is Canistracci OIL before creating the example.

- Verify the created objects appear in the expected Configuration menu page.
 - Place a controlled test call or run the related status check.
 - Remove or disable temporary test numbers when the example is no longer needed.
