

Use on mobile device

MiRTA PBX is a web application and can also be used from a mobile phone browser. Use the same MiRTA PBX address, username, password, and tenant selection process that you use on a desktop browser.

Login

Change Password

MiRTA PBX login page on a mobile phone viewport.

Log in from a phone

1. Open the MiRTA PBX web address in the phone browser.
2. Enter your **Username** and **Password**.
3. Select **Login**.
4. If your account requires a second authentication step, complete it before continuing.

External Channels

MiRTA PBX after login on a mobile phone viewport.

Work with the mobile layout

After login, the same tenant-aware interface is available on the phone. The selected tenant remains visible in the header area, and the page content adapts to the narrower screen.

Before changing configuration, verify that the selected tenant is correct. Any page opened from the mobile interface uses the tenant currently selected in the header.

il

Mobile navigation drawer opened from the header menu icon.

Open the navigation menu

On a phone, the left navigation is hidden until it is needed. Select the menu icon in the header to open the navigation drawer, then choose the same sections you use on desktop, such as **Configuration**, **Status**, or **Admin**.

Extensions configuration page displayed on a mobile phone viewport.

Use configuration pages

Configuration pages can be opened and edited from the mobile interface. Forms, buttons, filters, and tables remain available, although wide tables may require horizontal scrolling or a desktop browser for longer editing sessions.

Recommended use

Use case	Recommendation
Quick checks	Use the phone interface to check tenant selection, status pages, recent records, and simple configuration values.
Small changes	Use the phone interface for short edits when the required fields are visible and easy to review.
Large changes	Use a desktop browser for long forms, large grids, bulk actions, or changes that require comparing many fields.
