

Grandstream GS Wave

[Back to Phone Model Examples](#)

This is the a QR-code provisioned phone, so you need to activate the "Allow QR code generation" in the template and use the following template:

```
<?xml version="1.0" encoding="utf-8"?>
<AccountConfig version="1">
  <Account>
    <RegisterServer>{$server_host|devel.mirtapbx.com}</RegisterServer>
    <OutboundServer>{$server_host|devel.mirtapbx.com}</OutboundServer>
    <UserID>{$username}</UserID>
    <AuthID>{$username}</AuthID>
    <AuthPass>{$secret}</AuthPass>
    <AccountName>{$displayname}</AccountName>
    <DisplayName>{$displayname}</DisplayName>
    <Dialplan>{x+|*x+|*++}</Dialplan>
    <RandomPort>0</RandomPort>
    <SecOutboundServer></SecOutboundServer>
    <Voicemail>*97</Voicemail>
  </Account>
</AccountConfig>
```
