

# AGI Script

The **AGI Script** type runs an AGI script and compares the AGIRERESULT variable with TRUE.

Open **Configuration > Conditions**, select **New Condition**, enter a name, choose **AGI Script** in the Type field, complete the type-specific fields, and select **Save**.

The screenshot shows a web form for editing an AGI Script condition. The form is titled "Information" in a blue header. It contains the following fields and controls:

- Name:** A text input field containing "Docs Condition - AGI Script".
- Type:** A dropdown menu with "AGI Script" selected.
- AGI Script:** A dropdown menu with "Docs Demo AGI 1" selected.
- Content of variable AGIRERESULT will be compared with TRUE:** A text label.
- Destination when matches:** A dropdown menu with "Please select condition destination" selected.
- Destination when NOT matches:** A dropdown menu with "Please select condition destination" selected.
- Buttons:** Three buttons at the bottom: "Save" (blue), "Delete" (red), and "Back" (grey).

AGI Script condition edit form in the Canistracci OIL tenant.

## Fields

Field or option	Description
Name	Display name used in condition lists and selectors.
Type	Select AGI Script.
AGI Script	Script to execute.
Parameter 1-5	Optional script parameters, depending on the selected script definition.
AGIRERESULT	The script result variable must evaluate to TRUE for the condition to match.

# Example

Field	Example value
Name	Docs Condition - AGI Script
AGI Script	Docs Demo AGI 1

## Destinations

For tenant conditions, select the destinations that should run when the condition matches and when it does not match. Global conditions are referenced by tenant-level Use a Global Condition records.

## Editing and deleting

To edit this condition, open **Docs Condition - AGI Script** from the Conditions list, adjust the fields, and select **Save**. Before deleting it, check IVRs, schedules, routes, feature codes, and other call-flow objects that may reference it.
