[Save](#) [Delete](#) [Back](#)

Check if a specific channel is running condition edit form in the Canistracci OIL tenant.

## Fields

Field or option	Description
-----------------	-------------

Name	Display name used in condition lists and selectors.
Type	Select Check if a specific channel is running.
Channel	Channel name or pattern.
Context	Dialplan context to match.
Extension	Dialplan extension to match.
State	Channel state to match.
CallerID	Caller ID value to match.

## Example

Field	Example value
Name	Docs Condition - Check Channel
Channel	PJSIP/100

## Destinations

For tenant conditions, select the destinations that should run when the condition matches and when it does not match. Global conditions are referenced by tenant-level Use a Global Condition records.

## Editing and deleting

To edit this condition, open **Docs Condition - Check if a specific channel is running** from the Conditions list, adjust the fields, and select **Save**. Before deleting it, check IVRs, schedules, routes, feature codes, and other call-flow objects that may reference it.
