

# Check SMS message

The **Check SMS message** type matches SMS message content.

Open **Configuration > Conditions**, select **New Condition**, enter a name, choose **Check SMS message** in the Type field, complete the type-specific fields, and select **Save**.

The screenshot shows a web form for editing a condition. At the top is a blue header with the word 'Information'. Below it are several input fields and checkboxes. The 'Name' field contains 'Docs Condition - Check SMS message'. The 'Type' dropdown is set to 'Check SMS message'. The 'Message content' field contains 'STOP'. There are three checkboxes: 'Case sensitive' (checked), 'Exact Match' (checked), and 'Use regex' (unchecked). Below these are two dropdown menus for 'Destination when matches' and 'Destination when NOT matches', both showing 'Please select condition destination'. At the bottom are three buttons: 'Save' (blue), 'Delete' (red), and 'Back' (grey).

Check SMS message condition edit form in the Canistracci OIL tenant.

## Fields

Field or option	Description
Name	Display name used in condition lists and selectors.
Type	Select Check SMS message.
Message content	Text or expression used to match the SMS body.
Case sensitive	Requires exact case matching.
Exact Match	Compares exact content without filtering characters.
Use regex	Treats message content as a regular expression.

# Example

Field	Example value
Name	Docs Condition - Check SMS Message
Message content	STOP

## Destinations

For tenant conditions, select the destinations that should run when the condition matches and when it does not match. Global conditions are referenced by tenant-level Use a Global Condition records.

## Editing and deleting

To edit this condition, open **Docs Condition - Check SMS message** from the Conditions list, adjust the fields, and select **Save**. Before deleting it, check IVRs, schedules, routes, feature codes, and other call-flow objects that may reference it.
