

Create and Edit AGI Scripts

Use this page when creating a new AGI script or editing an existing AGI script from **Configuration > AGI Scripts**.

The form screenshots below are separated by block where the application exposes separate sections. Complete the required values, review routing or destination references, and save the record.

Add and edit form

The screenshot shows a form titled "Information" with the following fields and buttons:

- Name:
- Description:
- Path:
- Number of Parameters:
- Buttons: Save, Delete, Back

AGI Scripts add/edit form.

Saving and deleting

Task	How to do it
Create	Select the new action from the AGI Scripts list, fill the required fields, and select Save.
Edit	Open the existing AGI script, update the needed fields, and select Save.
Delete	Before deleting a AGI script, check call-flow, destination, schedule, report, provisioning, or integration references. Use the row delete action or the form delete action when available, then confirm.
