

Create and Edit Button Layouts

Use this page when creating a new button layout or editing an existing button layout from **Configuration > Button Layouts**.

The form screenshots below are separated by block where the application exposes separate sections. Complete the required values, review routing or destination references, and save the record.

Add and edit form

Information

Name:

Button Layout Template:

Use generic template

Code:

☐ Use Phone Book

Start:

End:

Save

Delete

Back

Button Layouts add/edit form.

Main fields

Field	Description
Name:	Display name used in lists and references.

Field	Description
Button Layout Template:	Object setting shown by the form.
Code:	Dialed value, identifier, or matching value used by the PBX.
usephonebook	Object setting shown by the form.
Phone Book:	Object setting shown by the form.
Start:	Object setting shown by the form.
End:	Object setting shown by the form.

Saving and deleting

Task	How to do it
Create	Select the new action from the Button Layouts list, fill the required fields, and select Save.
Edit	Open the existing button layout, update the needed fields, and select Save.
Delete	Before deleting a button layout, check call-flow, destination, schedule, report, provisioning, or integration references. Use the row delete action or the form delete action when available, then confirm.
