

# Create and Edit Outbound PIN Codes

Use this page when creating a new outbound PIN code or editing an existing outbound PIN code from **Configuration > Outbound PIN Codes**.

The form screenshots below are separated by block where the application exposes separate sections. Complete the required values, review routing or destination references, and save the record.

## Add and edit form

The screenshot shows a web form titled "Information" for adding or editing an outbound PIN code. It includes a "Description:" text input field, a "PIN:" text input field with asterisks, a "Disabled" checkbox, and three buttons: "Save" (blue), "Delete" (red), and "Back" (grey).

Outbound PIN Codes add/edit form.

## Saving and deleting

Task	How to do it
Create	Select the new action from the Outbound PIN Codes list, fill the required fields, and select Save.
Edit	Open the existing outbound PIN code, update the needed fields, and select Save.
Delete	Before deleting a outbound PIN code, check call-flow, destination, schedule, report, provisioning, or integration references. Use the row delete action or the form delete action when available, then confirm.
