

Date - between dates

The **Date - between dates** type matches when the current date/time is between a configured start and end value.

Open **Configuration > Conditions**, select **New Condition**, enter a name, choose **Date - between dates** in the Type field, complete the type-specific fields, and select **Save**.

Information

Name:

Type:

Timezone:

Between Date/Time:	<input type="text" value="2026-12-24 09:00:00"/>	And:	<input type="text" value="2026-12-24 17:00:00"/>	<input checked="" type="checkbox"/> Recurring
Between Date/Time:	<input type="text"/>	And:	<input type="text"/>	<input type="checkbox"/> Recurring
Between Date/Time:	<input type="text"/>	And:	<input type="text"/>	<input type="checkbox"/> Recurring
Between Date/Time:	<input type="text"/>	And:	<input type="text"/>	<input type="checkbox"/> Recurring
Between Date/Time:	<input type="text"/>	And:	<input type="text"/>	<input type="checkbox"/> Recurring
Between Date/Time:	<input type="text"/>	And:	<input type="text"/>	<input type="checkbox"/> Recurring
Between Date/Time:	<input type="text"/>	And:	<input type="text"/>	<input type="checkbox"/> Recurring

Destination when matches:

Destination when NOT matches:

Date - between dates condition edit form in the Canistracci OIL tenant.

Fields

Field or option	Description
Name	Display name used in condition lists and selectors.
Type	Select Date - between dates.
Between Date/Time	Start and end values for a matching window. Multiple windows can be configured.
Recurring	Treats the date window as recurring.

Example

Field	Example value
Name	Docs Condition - Date - Between Dates
Between Date/Time	2026-12-24 09:00:00 and 2026-12-24 17:00:00

Destinations

For tenant conditions, select the destinations that should run when the condition matches and when it does not match. Global conditions are referenced by tenant-level Use a Global Condition records.

Editing and deleting

To edit this condition, open **Docs Condition - Date - between dates** from the Conditions list, adjust the fields, and select **Save**. Before deleting it, check IVRs, schedules, routes, feature codes, and other call-flow objects that may reference it.
