

Feature code parameter

The **Feature code parameter** type matches parameters collected by a feature code.

Open **Configuration > Conditions**, select **New Condition**, enter a name, choose **Feature code parameter** in the Type field, complete the type-specific fields, and select **Save**.

Back

Feature code parameter condition edit form in the Canistracci OIL tenant.

Fields

Field or option	Description
Name	Display name used in condition lists and selectors.

Field or option	Description
Type	Select Feature code parameter.
Parameter	Parameter value to compare. Multiple parameter rows can be used.

Example

Field	Example value
Name	Docs Condition - Feature Code Parameter
Parameter 1	42

Destinations

For tenant conditions, select the destinations that should run when the condition matches and when it does not match. Global conditions are referenced by tenant-level Use a Global Condition records.

Editing and deleting

To edit this condition, open **Docs Condition - Feature code parameter** from the Conditions list, adjust the fields, and select **Save**. Before deleting it, check IVRs, schedules, routes, feature codes, and other call-flow objects that may reference it.
