Back

Multiple extensions status condition edit form in the Canistracci OIL tenant.

Fields

Field or option	Description
Name	Display name used in condition lists and selectors.
Type	Select Multiple extensions status.
Extensions	Extensions or numbered flows included in the check.
State	Combined state rule that must match.

Example

Field	Example value
Name	Docs Condition - Multiple Extensions Status
Extensions	100 and 101
State	All users are online

Destinations

For tenant conditions, select the destinations that should run when the condition matches and when it does not match. Global conditions are referenced by tenant-level Use a Global Condition records.

Editing and deleting

To edit this condition, open **Docs Condition - Multiple extensions status** from the Conditions list, adjust the fields, and select **Save**. Before deleting it, check IVRs, schedules, routes, feature codes, and other call-flow objects that may reference it.
