

# Overview

The **Dialing Exceptions** page controls which extensions can dial selected feature codes, patterns, or destination groups. Open it from **Configuration > Settings > Exceptions**.

The page works against the tenant currently selected in the top bar. The screenshots and demo rows were captured in the **Canistracci OIL** tenant.

Dialing Exceptions list page in the Canistracci OIL tenant.

## Working with objects

Task	How to do it
Edit	Change the checkbox matrix to allow or block specific dialing patterns, then save or test the result.
Test	Use the test controls to validate how a number is handled for a selected extension.
Delete	There is no separate delete action because the page stores rule states, not independent rows.

## Page functions

Action	Description
Test	Runs a test for the selected configuration.

## Demo records

The tenant contains 1 documentation demo record for this page: an advanced dialing exception from **^10[0-9]\$** to **^\\*900\$**.
