

Overview

The **Internal Routing Rules** page applies regex-based rewriting and destination selection for internal dialing. Open it from **Configuration > Settings > Internal Routing Rules**.

The page works against the tenant currently selected in the top bar. The screenshots and demo rows were captured in the **Canistracci OIL** tenant.

Internal Routing Rules list page in the Canistracci OIL tenant.

Working with objects

Task	How to do it
Add	Select the New internal routing rule action, complete the form, and select Save.
Edit	Open the internal routing rule from the list by selecting its name, number, or row action. Change the form and select Save.
Delete	Select the row checkbox and use Delete Selected, or open the internal routing rule and select Delete, then confirm.

Page functions

Action	Description
New Internal Routing Rule	Opens the creation form for a new internal routing rule.
Delete Selected	Deletes the selected rows after confirmation.

List columns

Column	Description
Regex	Object setting shown by the form.
Extension	Target or routing selection used when the object sends a call or message onward.
Digits to add	Object setting shown by the form.
Digits to del	Object setting shown by the form.

Demo records

The tenant contains 1 documentation demo record for this page: ^99991\$.

Deleting records

Before deleting a internal routing rule, check references from call flows, destinations, schedules, reports, or provisioning objects. MiRTA PBX asks for confirmation before the delete is submitted.
