

Weektime

The **Weektime** type matches weekly recurring time slots, such as business hours or after-hours periods.

Open **Configuration > Conditions**, select **New Condition**, enter a name, choose **Weektime** in the Type field, complete the type-specific fields, and select **Save**.

Back

Weektime condition edit form in the Canistracci OIL tenant.

Fields

| Field or option | Description |
|------------------|--|
| Name | Display name used in condition lists and selectors. |
| Type | Select Weektime. |
| Timezone | Timezone used to evaluate the weekly schedule. Leave it empty to use the tenant default. |
| Select timeslots | Weekly calendar where matching time blocks are drawn. |

Example

| Field | Example value |
|----------|---------------------------|
| Name | Docs Condition - Weektime |
| Timeslot | Monday 09:00-17:00 |

Destinations

For tenant conditions, select the destinations that should run when the condition matches and when it does not match. Global conditions are referenced by tenant-level Use a Global Condition records.

Editing and deleting

To edit this condition, open **Docs Condition - Weektime** from the Conditions list, adjust the fields, and select **Save**. Before deleting it, check IVRs, schedules, routes, feature codes, and other call-flow objects that may reference it.
